Curtis Williams

SENIOR GTM SYSTEMS ENGINEER | AI & REVENUE SYSTEMS ARCHITECT

Denver, Colorado | Portfolio | LinkedIn | GitHub

Senior GTM systems engineer focused on Salesforce, revenue operations, and AI-assisted delivery. Builds reliable routing, release, integration, and governance systems; uses agents to accelerate development, testing, and operational support.

CORE CAPABILITIES

Salesforce architecture & CPQ • Apex & Flow • Agent workflows & MCP • CI/CD • LeanData • API integrations • SQL, BigQuery & dbt • Data governance

PROFESSIONAL EXPERIENCE

Senior GTM Systems Engineer | Fivetran

Apr 2024 - Present / Remote · Denver, Colorado

- Built an internal agent toolkit that edits LeanData routing graphs, explains assignment decisions, creates Salesforce CPQ products, and answers metadata and dependency questions through MCP.
- Embedded agents in Buildkite deployments and browser-based Salesforce UAT; prototyped a seller cockpit that combines Salesforce account, opportunity, and usage context.
- Used Claude Code to build and refactor Apex, triggers, and Flows across lead routing, CPQ, and validation workflows.
- Led the move to a Copado and GitHub release pipeline, enabling structured multi-environment deployments and a zero-downtime fiscal-year launch.
- Re-architected LeanData and Salesforce routing for sub-second processing, eliminating 4,879 unnecessary accounts (81.5%).
- Removed 56 objects, 350+ fields, 30+ automations, and 13 GB of storage; reduced System Admin roles from 125 to 61 and admin-level permissions by 50%.
- Configured Census reverse ETL, wrote BigQuery and Salesforce-history SQL for Xactly compensation, partnered on dbt models, and led the Salesforce-Rocketlane integration.
- Resolved an end-of-quarter CPQ outage in under an hour and uncovered a $2M discrepancy through address-validation work.

Software Engineer II | Transcarent

Nov 2021 - Apr 2024 / Remote

- Built and scaled Salesforce integrations during the 98point6 merger using Apex, Flow, and API-driven architecture with HIPAA compliance.
- Developed and optimized Apex service classes, triggers, and Flow automations across opportunity, product, and billing workflows.
- Partnered with Marketing on Account Engagement automation and led the 2023 internal hackathon.
- Contributed 900+ GitHub commits in 2023 and led major repository changes.
- Drove roadmap planning, test strategy, and technical-debt reduction with an emphasis on automation reliability.

PROFESSIONAL EXPERIENCE CONTINUED

Salesforce Developer | Vantage Point Consulting

Apr 2021 - Oct 2021 / Minneapolis, Minnesota

- Led financial-services client projects in developer and architect roles, delivering Apex, Visualforce, LWC, Aura, and Salesforce automation.
- Translated stakeholder requirements into technical specifications and managed testing and deployments across environments.

Associate Software Engineer | Boom Lab / Threebridge

Jan 2020 - Apr 2021 / Minneapolis-St. Paul

- Client assignments: Salesforce development at Cantel Medical (Oct 2020-Apr 2021), and product-configuration engineering at Andersen Corporation (Jan-Sep 2020).
- At Cantel, delivered Apex, Visualforce, Aura, and data automation. At Andersen, developed product-configuration code, test plans, and deployment documentation.

EARLIER EXPERIENCE

Target - Advanced to Sr Specialist, Space and Presentation; supported three apparel-brand launches across 1,000+ stores, contributing to approximately 20% comp growth and $2M in sales.

SSQTCH, LLC - Co-founded an Emmy Award-winning multimedia production company and led client development, marketing, editing, and production work.
